

As a public radio station, WMHT-FM works hard to serve its constituents. With the advent of technological changes in broadcasting, it is fast becoming apparent that an individual station, licensed to serve the public, that is an independent voice, and one that is not run by a larger entity, is vital and necessary to broaden the options that listeners might have.

The opportunity for a small station like WMHT-FM to have access to an SAC to use for additional program material will help WMHT-FM do more to serve its community.

We respectfully submit that while there may be unresolved technical issues, this seems like an opportunity worth exploring. It may be a cost-effective way for small organizations to be able to stretch their footprint across many interests, and therefore attract an even wider base of support for compelling, unique, and interesting programming.

Thank you for considering the comments on this very important issue.
